- advertising creative recycling by media -

International Training for Youth Workers

19-29 March 2015

Terény, HUNGARY

Dear Friends,

We are glad to invite You to our intercultural training course named

Advertising the Change!

organized by ReCreativity Social Enterprise & financed by the **Erasmus+ Programme.**

We invite you to take this creative adventure with us!

The 10 days long program will take place in Terény, Hungary in March 2015.

In this letter you will find all you need to know about it's goals, program, information about accommodation, money reimbursement and other practical issues.

Why?

The aim of **Advertising the Change** is to put environment and sustanibility in a shape where people can understand and connect to their daily life. These concepts such as sustanibility and environmental changes are part of our life and get more and more attention but people many times do not know what to do with it. We'll use the tools of the media for the dissemination of this project and together we'll discover how to make best practice 'tutorial' videos, how to build up marketing and dissemination strategies in order to reach more people with our activities.

We'll mix the method of creative recycling with media to spread the technique and method itself to other youth NGOs. During the training we create best practice videos and photo sessions which would allow also others to build such techniques in their work or in their everyday life.

We'll use the method of 'learning by experience'. In a mixed group of 42 young people you have the chance to develop skills for life such as social skills, entrepreneurship, work in a team, communication of art, speak in a foreign language, experience and deal with differences in cultures, backgrounds, styles of expression.

Creative recycling gives you the chance to see modern materials – considered as waste many times – as an opportunity to create something new. The result will be visible, touchable, designed and useful, you can take it home and use it every day. In this way you give a new life to the material, and your attitude changes while creating. We will come together for 10 days, provide workshops and many ideas to each other, we will sew, design, paint, draw, cut, tint, hammer, and – very importantly – document the whole process.

Advertising the Change is a 10 days long Training Programme

- There will be 42 participants from 9 different organizations, 8 different countries (Spain, Lithuania, Ireland, Latvia, Italy, Romania, Portugal, Hungary)
- To think in a concious way about sustainability and go to actions
- To share best practices, find new techniques and learn together in an intercultural, inspiring environment.
- To help people involved in youth work to develop organising, coaching and mentoring skills and be inspired by other cultures in order to realize more projects in this topic and involve a big mass of people.
- To encourage intercultural learning by creative art and media
- To develop skills by non-formal methods
- A place where you make friends with people from different countries within Europe
- A very good chance to get inspired and inspire others!

How?

The program of the training course contains several different elements – which provides the variety during the 10 days.

As it was mentioned above the program uses the method of "learning by experience", which is a non-formal learning method. The focus is on getting new experiences first and reflecting on it after all. In the beginning of the program there will be team building activities as participants are going to work together for 10 days.

Furthermore there will be some lectures on media tools in order for the participants to have a clear picture and fresh knowledge on the topic. There will be practical & techinal input from the team and the organisers as well. (Like how to use the sewing machine, how to work with the camera, etc). There will be input from outside – by invited guests – who are going to organise workshops and give presentation for inspiration.

The other important element of the program is the connection with the locals. We are going to use outdoor activities as a tool to make connections between the inernational group and the locals.
